

System Design Highlights

Features

The blower base products by Belmar Industries are designed to accommodate a wide range of blower types and applications. The BI2 series includes the blower base with an unpacked discharge silencer for blowers operating below transition speed. The BR2 series includes the blower base and a discharge silencer, with acoustical packing, for use on blowers operating above transition speed.

Also available from Belmar Industries: intake silencer, intake filter, belt guard, intake silencer support bracket (with mounting band) and blower to silencer connectors with clamps.

The silencer connection sizes, types and location can all be altered to accommodate your installation requirements. Belmar Industries stands ready to work with you on any installation or technical applications you have.

Customize your exhaust system to meet your application needs!

We will work with you to design the silencer and exhaust components that will save product cost and installation time.
